## Hospice and Palliative Month

For more than 40 years, hospice has helped provide comfort and dignity to millions of people, allowing them to spend their final months at home, surrounded by their loved ones. Hospices ensure that pain management, therapies, and treatments all support a plan of care that is centered on the person's goals. This care also provides emotional support and advice to help family members become confident caregivers and adjust to the future with grief support for up to a year.
